The Penn State Cancer Institute at The Pennsylvania State University College of Medicine is recruiting a tenure track translational scientist. This position is primarily research and includes an attractive start-up package and extensive operating resources. The successful individual must possess an M.D., M.D./Ph.D. or Ph.D. with experience in translational research with a specific interest in solid tumor biology. The emphasis will be on developing novel-anticancer agents with distinctive molecular targets and mechanisms of action leading to promising new treatments. The individual should have qualifications to be appointed at the academic rank of associate professor/professor. Established record of investigations in this field, scientific accomplishments and publication record is essential. The ultimate goal of this translational research is to support early phase clinical trial effort. The position is part of the continuing growth of the Penn State Cancer Institute and a planned major expansion of the research facilities of the College over the next few years. For additional information about the Penn State Cancer Institute, please visit the following website: http://www.hmc.psu.edu/cancer/. Interested applicants should submit curriculum vitae, a brief statement of research plans and arrange to have three letters of reference sent to: Chandra P. Belani, M.D., Deputy Director, Penn State Cancer Institute, Penn State College of Medicine, 500 University Drive, H072, Hershey, PA 17033. Review of applications will continue until the position is filled. Penn State is committed to affirmative action, equal opportunity and the diversity of its workforce.
