Notice For Support Recruiting Diabetes Patient Volunteers for Research: The Penn State Hershey Diabetes and Obesity Institute will work with investigators to recruit subjects for diabetes research using a HIPAA-compliant, IRB-approved process to notify patients in the Diabetes Patient Registry. This process allows invitations to be mailed to patients by their participating physicians. The costs for these mailings should be budgeted when grant budgets are developed. The Patient Registry Database is also a possible source of data for retrospective or epidemiological studies. Please contact Lorraine Mulfinger (LXM14@psu.edu) if you need cost estimates, information on the searchable data fields in the registry, and/or a “Resource” description for your grant.
